1 Feb

All Students Return

Due to COVID-19 a number of school events have either been postponed until further notice or cancelled

Wishing all of our students, staff and school community a Very Merry Christmas and a Happy & Safe New Year

We have held our last meeting for 2020. We look forward to working with the school in 2021. Meetings will commence in February 2021. All welcome to attend.

OFFICE OPENING HOURS

Please be aware the office is open Monday-Thursday 8:00am-4:00pm and Friday 8:00am-3:30pm. Outside office hours, a message may be left on the school answering machine.

Parents and caregivers are reminded an appointment is necessary before meeting with teachers as they have class, playground duty and other commitments during the school day.

Congratulations to Eva Turner and Cora Hodder from Year 7 for completing the Premier's Reading Challenge this Year. It has been a difficult year, yet these two dedicated students independently completed the challenge, reading at least 20 books through 2020.

Well done girls!

RUTHERFORD TECHNOLOGY HIGH SCHOOL NEWSLETTER - 18th December 2020

FROM THE PRINCIPAL

At Rutherford Technology High School we strive to establish high expectations for all that we do. This year we met, and exceeded, despite COVID-19.

Our No 1. Priority is, and will always, be academic success and this year has been no different. Noah Curry and Phoebe Quilty are just two examples of this with Noah winning a place in the Hunter Central Coast Reprise Exemplar Performances for 2020 and Phoebe nominated for possible inclusion in Texstyle, the annual exhibition of outstanding Major Textiles Projects developed by HSC Textiles and Design students. The number of HSC students who have been offered early entry to universities has continued to grow and we await our HSC results that are released on the 18th December.

Our extension program continues to challenge our students to push the boundaries of their achievement. Differentiated teaching & learning, experiences that test creativity, and a healthy competitive environment is being delivered and the achievements acknowledged.

Our Science, Technology, Engineering and Maths – STEM – Program is ensuring that we produce the innovators of the future in these important fields. Coding, robotics and the use of drones all make for an exciting program that tests the problem-solving ability of our students. It was impressive to see the results of our STEM Program in competitions such as the FI in schools.

Every week we have recognised academic, sporting and personal success with our PBL awards during our Thursday assemblies.

We continue to excel in extra-curricula academic pursuits such as debating, and writing. I could go on, but you get the picture that our students are excelling academically both inside and outside of the classroom.

A good school excels academically, but a great school produces students who are achievers across a range of pursuits. Our creative and performing arts program has not happened in 2020 but hopefully with restrictions being lifted will be back in 2021. Music, Art, Dance and Drama are being strongly supported and the talent being developed by our staff will be highlighted in the future.

Our Targeted Sports Program is reaching new heights in terms of quantity and quality of athletes with record numbers of students participating in our Football and Rugby League programs.

We have an amazing team of school leaders, teachers, support teachers and administration staff. This year we welcomed a Mr O'Leary to the DP chair, and Mrs Nenad had her first anniversary in the DP's chair with Mrs Pratt now just part of the Rutherford Technology High School furniture. I wish to acknowledge their prodigious contribution to our 2020 success. Our executive team is filled with dedicated and caring leaders who are the true embodiment of the concept of a team, and our teachers and support teachers have brought talent, passion, care and skill to our students. Our administration staff are the best I have ever worked with. They are often the face of the school, the messengers, the marketers and the behind the scenes contributors. I am inspired every day by their love of the school and the quality of what they do. They hold a very special place in my heart.

I would also like to thank my primary principal colleagues. We enjoy close relationships and have strengthened the links between our schools in 2020 to not only improve the transition to high school but to assist with the delivery of programs in your schools. I look forward to these partnerships continuing and strengthening.

Unfortunately, as is often the case at the end of the school year, we have to say goodbye to some very special people: Ms Gibson in Support, Mr Marselos in the LEC, Mrs Ansell and Mr Lacey in English are leaving us. Thank you for giving so much to Rutherford Technology High School.

With our incredible team we deliver an outstanding education environment for our students. Our young people are why we are here, doing what we love. We continue to set the bar high for them and they have responded marvellously. They are proving that if you believe in young people, push them to the boundaries of their capabilities, and support them with the right knowledge, skill and guidance they will achieve great things. I am so proud of our students! Our presentation day on Friday 11th December 2020 was proof of our success. Finally, I love my job and I consider it a privilege to be our school's principal. I would like to thank our community for making Rutherford Technology High School the special place that it is. Our success is shared by students, staff, parents, partners and friends. We deserve to be incredibly proud of who we are and what we have achieved.

Wishing you a wonderful Christmas and New Year.

Ms Simone Hughes Principal

ICT FACULTY REPORT

The impact of COVID-19 and the need to work and learn from home has presented a new an exciting challenge to the ICT Faculty this year, amidst a number of exciting projects and learning opportunities throughout 2020.

Information Communications and Technology education is important as students look to navigate the challenges of work, school and entertainment in an increasingly technology dependant society. In our faculty we have strived to provide students with the opportunity to learn in a number of computing areas, and provided them with the guidance, hardware, and software to experiment with and create projects that directly translate to the industry.

This year the faculty placed a large focus on digital communication. Setting up and training staff on the use of CANVAS has been a huge task. CANVAS Action Group (CAG) leader Mr Short has done a phenomenal job solving technological issues, answering parental questions, and developing a standardised platform to allow students and teachers to navigate the challenge that was learning from home. Staff attended training sessions run by the ICT faculty to advance their skills and the CAG team have done an amazing job digitising our work flow in 2020.

In Stage Four Digital Technologies this year students have been provided with the opportunity to explore a number of areas in the field. These have been developed into several project-based units, including the implementation of Python Coding through the Grok and Code Combat platforms, HTML website creation, binary coding and Cryptography among others! These projects give students the opportunity to develop skills that can be directly translated into the modern workforce and develop creative practical projects to implement this knowledge into a usable design project. Outside of the practical domain, students also study how computers work, and explore the possibilities and importance of people in the ICT workforce to discover the impact of technology creators on our world.

Robotics has had a large focus this year. Our Year 9 & Year 10 Information and Software Technology (IST) classes and Robotics Mini-Elective have worked hard coding Lego Mind-Storm robots to complete complex tasks such as robot sumo-wrestling, maze navigation, detecting walls and objects, using loops to repeat functions, and using a plethora of other tools to interact with their environment and complete tasks autonomously. Whilst it was cancelled this year, our faculty is looking for keen members to compete in next year's Robo-Cup competition, to compete against other schools to perform a number of tasks.

2021 is looking bright in ICT for staff and students. Year 12 will see the continuation of both our Design and Technology Multimedia and Software design classes, who will be completing major projects and working hard to prepare for their HSC. This will include the use of our new dedicated multimedia room! These subjects will also be running in Year 11, with the inclusion of the new VET Digital Media and Networking subject run by Mr Cooper. This will provide students with a Certificate Three in Information and Digital Media Technology on completion.

The ICT staff are currently hard at work planning exciting projects, excursions, and lessons for 2021, with a huge increase in subject selection and elective uptake. This will provide some amazing opportunities that we cannot wait to explore with our students!

Have a happy holiday! See you back in Term 1, 2020!

Mr Brady Cooper Relieving Head Teacher ICT Faculty

YEAR 7 REPORT

For a first year of High School, 2020 has certainly proven to be a challenge!

Despite the many obstacles presented, students have continued to impress us with their resiliency and tenacity to succeed. Looking back over the year it has been, it is hard to imagine it is the same group of students who sat in the hall for their Orientation Day 12 months ago. It has been an absolute pleasure watching you all grow and mature over what has been one of the trickiest years yet.

I am proud of the efforts every single student has made this year, and cannot wait to see what adventures 2021 has in store for our year group!

I hope you all have a very Merry Christmas, and your break gives you the opportunity to rest and recharge!

Ms Erin Bartlett Year 7 Year Advisor

RUTHERFORD TECHNOLOGY HIGH SCHOOL NEWSLETTER - 18th December 2020

Most people will be too young to remember "Money". Not the cash stuff, but the song. Originally written by The Beatles, and covered by The Flying Lizards from the early 80's (My personal favourite of the iconic song). But I digress. It's the first line of the song (a cliché), but pay dirt none-the-less, I'm talking about.

"They say the best things in life are free..."

Although the song is about wanting (or most probably needing) money, at Rutherford Technology High School the best things are definitely free - and I'm not just talking about our world-class public education system.

During assembly over the past few weeks we have been randomly drawing 'B-Bucks' for the chance to win some of the *most* excellent coin-a gift of the spending kind. A raffle by definition is when you buy a ticket and hope for the best; BUT to score a B-Buck, a chance, an opportunity, all students need to do is to *be* their best.

Our B-Bucks reward system will continue next year, and when things return to normal we should be able to enjoy our rewards days again. Where each term students can spend their 'free' money on food and fun. But, for now we've asked the kids to take a chance on being Respectful, Responsible, and Committed, in order to go into the draw for some motivation-however extrinsic.

B-Bucks are more than just a reward for positive behaviour, they are a reminder to us all that our core school values are worth the effort. The capital needed to gain these rewards is something that can certainly extend beyond the school gate too. By extension our values remain relevant to, and for, the wider community. We can *all* cash in on positive behaviour and spend up big in return-and not through Wallet Wizard either.

From a teacher's perspective, teachers also get paid when they give out B-Bucks. We not only get a positive response from the students, but we feel good too (enter another cliché-it's better to give than to receive). The return on investment is worth its weight in gold; positive behaviour begets positive behaviour, which begets positive behaviour! In truth, the more you give the more your likely to give-It's a win win, and it's definitely not a loan.

So, in the interest of continuing to build on our compounding collateral, don't save positive behaviour for a rainy day, spend up big and share the love. Till then it pays to remember, the best things in life are free..." that's what I (we) want'!

Mr Andrew Rutherford Rutherford Technology High School PBL Team

CHRISTMAS HAMPER DRIVE

On Thursday 10th December 2020 our students carried boxes of lovely gifts and bags of groceries for delivery to the Maitland Neighbourhood Centre for their annual Christmas Hamper Drive. Thank you also to the Rotary Club of Rutherford/Telarah who generously donated 100 Christmas puddings to include in the hampers.

Well-done to the SRC for leading this initiative!

A sincere thank you to our students, families and staff who have made such an important contribution to our community this Christmas.

MAITLAND AREA SCHOOL CHALLENGE

Telarah Bowling Club have invited six schools in the Maitland area and Rutherford Technology High School is one of them to participate in a challenge to design their new bowls shirt which will be worn by their bowling fraternity for the next three seasons.

This is a great opportunity for students to showcase their skills in art design and capture the culture of the local area. The club colours are red, green and white and the name of the team is 'Telarah Steamers' and the two themes should be incorporated into your design.

There will be a prize for the winning school!

For further information and submission of your design please see Maxine Creek in the careers staff room.

Telarah Bowls

The Friendly Club

Aboriginal Learning & Engagement Centre

The first year of the Aboriginal Learning and Engagement Centre has been a whirlwind of activity. We are amazed at what our students and community have worked together to accomplish and would like to share some of the highlights of 2020.

The Youth Xpress Leadership Program run by Genus Passi focused on building participants' self-confidence and developing leadership qualities. Team building and individual activities helped students explore First Nations history and the lives and qualities of strong Aboriginal and Torres Strait Islander leaders. There has been some really positive feedback from students about this program and we have all enjoyed the weekly visits from Genus.

Ryan Varley from **NRL School to Work** has started helping a group of senior students prepare to meet their potential and transition into further study or employment after school. This program offers students a wide range of support, including everything from job interview preparation and CV writing practice to help with early entry and transitioning to University. This is not to mention some of the opportunities available with the NRL we hope to announce if COVID restrictions continue to ease. We are grateful for the ongoing support of our students by Ryan and this program.

This year the **Aurora Outreach Program** also delivered a presentation for our students focused on high-achieving Aboriginal and Torres Strait Islander role models, including graduates from the world's leading universities including Cambridge, Harvard and Oxford. By sharing their journey, these role models provided insights for our students about university life, career pathways and the lessons they learned along the way. We believe it has helped to raise the aspirations of students to help make sure they 'dream big'.

The **Careers HQ Program** provided the opportunity for Year 9 students to participate in a workshop allowing students to explore career pathways post school options. The program aims to raise aspirations and inspire students. This workshop also supported

positive school to work transitions, helped to develop self-awareness and positively impacted the wellbeing of those who attended.

WOLLOTUKA

Ray Kelly from Wollotuka ran several **iBelieve** workshops with junior high school students, empowering them to make educated choices about their future aspirations and pathways to learning. The

interactive program also explained cultural connections and resources at our local Newcastle University, encouraging our students to aim high.

Our new **Cultural Writes** groups offered a range of supports, interventions and activities to a number of students. Everyone involved has demonstrated outstanding progress, well done!

Year 8 and Year 9 boys learnt how to throw spears and the uses of traditional hunting methods with Mr Michael Heitmeyer. They found that working together as a team was the best way to succeed. They then wrote about the experience and the benefits of team work with Mr Matthew Marselos.

-2-

CCC Kawuma boys along with Mr Matthew Marselos and Mr Michael Heitmeyer worked on designing and painting a mural. It started with designs drawn in the sand at the Yarning circle and ended up with a two panelled design that incorporated the totems the boys each have and how they are all now connected at Rutherford Technology High School.

The CCC Kawuma boys also spent some time focusing on the uses of different boomerangs. They took them out onto the oval and practiced getting them to land softly and return. They worked on developing their grips and learning when to release the boomerang.

Year 8 and Year 9 boys in the Cultural Writes program were also entered into the NSW Schools Reconciliation Challenge for 2020. These boys were nominated as finalists for their collaborative work titled 'Let's Get it Right'. Their work was displayed in the Powerhouse museum throughout NAIDOC week 2020 and will be exhibited at Barangaroo in 2021.

The **Way Ahead** Mental Health Month Mural project coordinated by Ms Munden this year showcased some more great art by students, helped by a large donation of materials from Maitland Bunnings.

This project was topped off by a visit from Mr Joe Williams organised thanks to the support of the Wellbeing team. These activities led into NAIDOC week celebrations. Thanks to Mr Connaughton and Mr Miller for organising traditional games for all students during sport.

Staff, students and guests attending workshops with Joe Williams

Most recently, Miss Munden took students to visit Maitland Regional Art Gallery as part of a **Citizenship Gift** program developed by Mr Adam Pratt and funded by our local member Ms Jenny Aitchison. The boomerang painting will continue next year and when complete, they will be presented as gifts to new citizens, welcoming them to Australia.

-3-

Looking back, we would like to acknowledge Mrs Keyes for her excellent leadership of our team this year, and give her special thanks for driving the completion of the new and improved **yarning circle** for Rutherford Technology High School. It has been used throughout so many of our programs and is a really helpful addition to our outdoor learning spaces. It turned out beautifully, and will give us many years of good yarning to come!

Staff and students using the new yarning circle for NAIDOC Week activities

Sistaspeak, run by Miss Crump, has often used this space and has also been an effective program building cultural knowledge and connections amongst our female students.

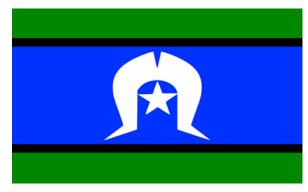

We would also like to thank Auntie Barb for her constant day to day support of our Aboriginal and Torres Strait Islander students in lessons, and especially for her hours of work towards the end of the year helping our students to turn our learning centre into a Christmas Wonderland! Additionally, thanks to all staff and students involved in working to improve outcomes in the number of learning interventions and support programs that have taken place in the Learning & Engagement Centre through the year.

Finally, we know that both students and staff are very grateful to Mr Marselos for the years he has dedicated to helping our students succeed. We congratulate him on securing a permanent position next year at another school, but will miss his thoughtful and helpful nature.

There are already some exciting things in the works for next year, which we're looking forward to sharing. Thanks for all the support and let's keep working together to continue to build on the wonderful work happening at Rutherford Technology High School to have an even more deadly 2021!

Aboriginal Learning & Engagement Centre Rutherford Technology High School

RUTHERFORD TECHNOLOGY HIGH SCHOOL NEWSLETTER - 18th December 2020

TSP FOOTBALL NEWS

As a result of COVID, and limited sporting events, the school did not have a end of year sport presentation ceremony therefore TSP Football Coordinator, Mr Blair Newham, arranged a separate, but very small, awards presentation for the TSP Football students that was held during Period 4 on Tuesday 15 December 2020.

Congratulations to the following TSP Football students who were presented with awards recognizing their achievement in TSP Football during 2020.

Year 7 TSP Football-Girls Player of the Year **Georgia Murphy**

Year 8 TSP Football-Girls Player of the Year **Felicity Perdon**

Year 9 TSP Football-Girls Player of the Year **Charlotte Lloyd**

Year 10 TSP Football-Girls Player of the Year *Olivia Roser*

Year 11 TSP Football Player of the Year **Ben Hackett**

TSP Football Most Improved Player - Female

Ruby Van Der Wel

Football Player of the Year Award–Junior Jayden Aitchison Year 7 TSP Football-Boys Player of the Year *Harrison Swan*

Year 8 TSP Football-Boys Player of the Year *Jackson Carroll*

Year 9 TSP Football-Boys Player of the Year Callum Priestley

Year 10 TSP Football-Boys Player of the Year **Ben Evans**

Year 12 TSP Football Player of the Year **Trent Bell**

TSP Football Most Improved Player - Female **Kyle McQuillan**

Football Player of the Year Award–Senior Ben Hackett

As special presentation was made to Mr Michael Whiting, outgoing Principal. This gift was fully funded by the TSP students and recognizes Mr Whiting's initial vision for the TSP Football Program which has grown from 20 students when it commenced 2015 to 200+ student in 2020.

Well done to all of our TSP Football award recipients!

Mr Blair Newham TSP Football Coordinator

The students and staff of Rutherford Technology High School would like to thank the following businesses and community members for their support of their 2020 School Combined Sport and End-of-Year Presentation Day:

Telarah Public School Preschool 2021 Enrolment

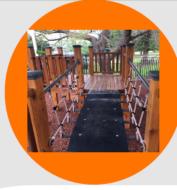

Telarah Public School Preschool provides outstanding early childhood education in a wonderful learning environment. This has been recognised through achieving the rating of Exceeding the National Quality Standard in all Quality Areas.

Our Preschool operates for children in the year before they start school. It is a 5-day fortnight program with children either attending:

- Mondays, Tuesdays and alternate Wednesdays OR
- Thursdays, Fridays and alternate Wednesdays

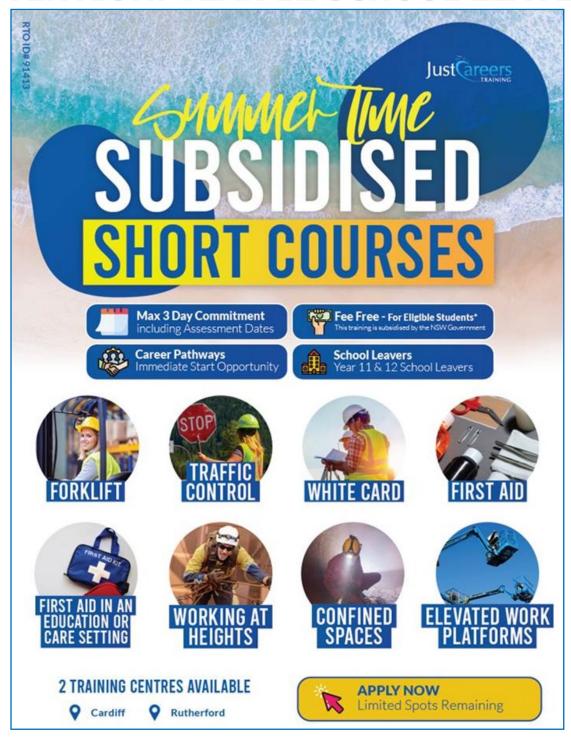

Fees are \$10 per day and further reduced for families of Aboriginal background or Health Care Card holders.

Please note fees have been exempt during COVID-19 and information regarding any further fee exemption periods will be provided at the start of 2021.

For all enquires please contact our office: 49328477

ATTENTION: YEAR 12 SCHOOL LEAVERS

JCT is proud to announce our Summer Time Subsidised Program for young School Leavers.

This is a special opportunity, funded by the NSW government to help train and skill school leavers for the workforce.

This is an amazing opportunity for young schools leavers–please ACT QUICK as these positions are strictly limited.

If you require any further details regarding this program, please don't hesitate to Rachael Cross (Mobile: 0416 526 699 or Email: rachael.cross@justcareerstraining.com.au)
